Club Hub is a web-based university club management service designed to enhance experiences among members of various clubs. The application aims to provide a platform for planning club events, managing memberships, facilitating discussions through forums, and fostering community engagement.

Functional Requirements:

1. **User Registration and Profile Management:**
   - Registration/Login:
     - Users can register for an account by providing a school email, student ID. first name, last name, username, password.
     - Users can log in to their accounts with email and password.
     - Users can reset their password.
     - Users can update their personal information(username, contact info).
   - Profile Management:
     - Users can create, update, or delete their profiles.
     - Users can view their profile details and edit personal information.
     - Users can logout from their accounts.
2. **Member Functionality:**
   - Participate in Forums:
     - Members can create a post with title and original content/question within the club forum.
     - Members can reply to other members' posts in club forums.
     - Members can upvote or downvote the post and each comment.
   - Sign up for Events
     - Members can view the list of events posted by the club.
     - Members can sign up for events by pressing a button.
3. **Club Management:**
   - President Club Management:
     - President and advisor can request to create a club, which must be approved by an administrator or system, providing the club name, description, and other relevant details.
     - President can manage officers in their clubs by assigning roles.
     - President can modify/delete clubs.
     - President can accept or reject membership requests.
     - President can remove members from the club.
   - Membership Management:
     - Users can see the list of clubs so they can join.
     - Users can see past club descriptions and past events.
     - Users can request to join clubs.

- ○ Users can leave clubs.
4. **Events Announcement Management:**
   - Events Management:
     - ○ Presidents and officers can create and announce events with various details (name, description, date, time, location, etc).
     - ○ President and officers can modify, and delete events.
     - ○ Members can view announcements.
5. **Forum/Discussion Board:**
   - Forum:
     - ○ Club members can discuss topics in various categories.

Non-functional Requirements:
1. **Performance**
   - Respond to user interaction, allowing data to be accessed within a couple of seconds.
   - Ensure data consistency by following ACID properties.
   - Common database queries actions should execute in under one second.
2. **Usability**
   - The application will have an intuitive design, be easily navigable, and user friendly.
3. **Security**
   - Strong password requirements.
   - Protect user data from unauthorized access.
   - Enforce data integrity.
4. **Scalability**
   - The application can be easily modified to adjust current as well as add further functionality.
